

Origo 3000 & 1500 Alcohol Stoves

Free-Standing Single- & Double-Burner Stoves

Origo 3000 (left)
and 1500 (above)

Ingeniously simple, Origo stoves have been continually improved based on feedback from boat owners and boat builders worldwide.

Origo 3000 double-burner and 1500 single-burner free-standing stoves are suitable for a wide range of boats. These units are typically mounted on gimbals (sold separately) to provide a level cooking surface. Origo free-standing stoves have few parts and, because they operate without pressure, there are no sensitive components liable to cause problems. The stainless-steel surface is rugged, easy to clean, and maintains its bright appearance in the punishing salt air and high humidity of marine environments.

Origo alcohol stoves are easy to fill. Each alcohol-fueled container holds 40 oz. (1.2 liters) of alcohol fuel. Pour the fuel into the container where it is absorbed by the non-flammable material inside. A full container provides about four-and-a-half hours of cooking time at the maximum setting, or about 10 hours at normal setting before refilling is required.

Origo units are environmentally friendly and extremely safe. The denatured alcohol-fuel is a clean and renewable energy source, and eliminates the need for fuel lines or gas bottles that could leak or explode. The stainless-steel alcohol fuel containers will not leak if deformed by impact or if turned upside down.

Just like cooking at home. Light the burner and adjust the flame with the regulator knob. The flame diffuser spreads the heat over the base of the burner pan, giving 7,000 BTU/hr. (2,000 watts) at full heat. These Origo units can bring 34 oz. (1 liter) of water to a boil in 10 minutes. It's as efficient as cooking with gas, yet much safer and cleaner.

Key Benefits

- Compact and easy to stow when not in use.
- Brings 34 oz. (1 liter) of water to a boil in 10 minutes.
- Durable with few parts to break down.
- Easy-to-clean stainless-steel surface.
- Easy access to the alcohol fuel container makes filling simple.
- Pressure-free alcohol offers a safe way to cook on board.
- Gimbals (sold separately) maintain a level cooking surface in rough seas.

Technical Specifications for Origo 3000 & 1500

Model	No. of Burners	Fuel	Cooking Power ⁽¹⁾ (BTU/hr/Watts)	Alcohol-Fuel Container Capacity (oz./liters)	Unit Dimensions (in/mm)			Dimensions w/Gimbals (in/mm)		
					Height	Width	Depth	Height	Width	Depth
Origo 3000	2	Alcohol	7,000/2,000	40.0/1.2	5.38/137	18.25/464	10.31/262	9.00/228	20.06/510	10.31/262
Origo 1500	1	Alcohol	7,000/2,000	40.0/1.2	5.38/137	9.31/236	10.31/262	9.00/228	11.13/282	10.31/262

Notes:

⁽¹⁾ Cooking time approx. 4.5 hours at maximum setting and 10 hours at normal setting.

Accessories for Origo 3000 & 1500

Smart Fuel

Dometic provides denatured alcohol (methylated spirits) fuel which burns with no odor or soot deposits. Alcohol fuel is used in combination with Origo's fuel containers (shown above).

Pot Holders

Origo pot holders fit into pre-made holes and clamp your pots and pans securely to the top of your Origo stove. They are easy to adjust and prevent pots from shifting or falling.

Gimbals

Gimbals for mounting free-standing Origo stoves and ovens allow you to cook safely in rough seas by keeping a level cooking surface and avoiding spills and burns.
